

October 9, 2020

Dear residents,

What an incredibly historic time in the world that we are sharing together. We are very thankful for everyone's support and patience during this pandemic.

We are pleased to let you know that we are taking very tangible steps toward making the South End Project a reality! So, this is a nice time for us to slowly, safely, and progressively move our project forward.

As the project begins to unfold there will be a lot of excitement in the South End of the campus. Our goal is to continually communicate and share information, which includes our tradition of videotaping the project's progress every Friday. In addition, we will create an ongoing newsletter with pertinent updates as time allows. We also anticipate a formal groundbreaking at a future point to be announced to commemorate this long-awaited, very exciting, and vibrant project.

For now, we want you to be aware that not only will Cobb Hill Construction be on the property to conduct some of their initial assessment work, but they will be very present the week of October 12th where they will begin to put up their safety fencing. The safety fencing allows for a specific designated work area according to all OSHA rules and other local ordinances. Typically, this fencing is bright orange in color so you will be able to see it.

As the project moves further along, we will be working on opportunities for residents to be a part of some of the factory tours with this innovative project. Although, there is an active virus I still want people to have an opportunity to see a part of the engineering and construction that occurs in a factory setting. We have done this in the past and it has proven to be an impressive experience relative to the quality of our work and ultimately the final product. This comes both in the building of roof trusses and the actual structures of the homes. We will figure out the very best and safest way to do this as I believe it is still a very important factor, and a fun factor at that!

We have worked very hard behind the scenes to get this project up and running despite the setbacks with this worldwide pandemic. This is a special time for HHH as it represents what the future can be like and how, we as an organization, continue to meet our mission and strive for sustainability.

I will continue to give periodic updates on this project on HHH Channel 919, as John and I have done for all our major projects and we will have a separate TV show update on Friday mornings. This in essence is an "inside the ropes" perspective on what is happening on the construction site. It also puts everyone in the middle of the construction in the safest fashion from your own living rooms.

Thank you for your ongoing support as we are about to make history!

Best wishes,

Michael Palmieri
President/CEO
